\* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used: —B.—Births; B. R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D. D.—Dysentery and Diarrhoea; R. D.—Respiratory diseases; M. D.—Maternal Deaths; D. R.—Death rate; I. D.—Infantile Deaths (including neonatal deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 24th March, 1951 relate to 149 towns with an estimated population of 16,002 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 64% of the total number of towns representing 55% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 8,250 and 4,732 representing birth and death rates of 26.8 and 15.4 per thousand of population respectively.

(A) *States (Parts A and C).*—The data here relate to 122 towns with an estimated population of 12,851 thousands. Information about Assam, Bombay, Madhya Pradesh and West Bengal could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 60% of the total number of towns representing 51% of the population is covered. The numbers of births and deaths

recorded in these towns were 6,862 and 3,863 representing birth and death rates of 27.8 and 13.6 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) *States (Part B).*—The data here relate to 27 towns with an estimated population of 3,151 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 84% of the total number of towns representing 82% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,388 and 889 representing birth and death rates of 22.9 and 14.7 per thousand of population respectively.

No towns recorded a high death rate of 50 or over per thousand of population.
